**Subject:** Three week update December 05, 2016

On December 05, 2016 DEQ received the most recent update from Carl Burnham of IRS Environmental regarding the quantity of Asbestos material removed from the CFAC site. A current cumulative total of 69,900 pounds of regulated asbestos waste has been removed from the facility(no increase since November 07). The waste disposal receipts for November indicate the removal of an additional 36,600 pounds of non-regulated asbestos material, yielding a “to date” non-regulated asbestos total of 1,104,620 pounds. Structures included in this removal include the West Rectifier, Rod Mill Building, Paste Plant, Quonset Hut, West Aluminum Unloader, Compressor Building, Laboratory, and Change House.

An asbestos project permit is in place through 2016 for the East Rectifier building and through December for “Change House”. Demolition notifications remain in place for the East and West Rectifiers, Rod Mill Building, Laboratory Building, Building 1 complex, and Change House.
